FOREIGN TRADE OPPORTUNITIES

Where addresses are omitted they may be obtained from the Bureau of Foreign and Domestic Commerce, Department of Commerce, and its branch offices.

N. 13627. Railway Material—A company organized by merchants in one of the principal cities in Asia desires catalogs from American manufacturers of railway material, according to a letter received at the Bureau of Foreign and Domestic Commerce from one of the foreign legations at Washington. This company was organized with a view to purchasing American goods direct.

No. 13631.. Motor Trucks—An American consul telegraphs from one of the European countries stating that an American located in his district desires prices immediately from reliable manufacturers in the United States for all available 1 to 3 ton motor trucks, delivered. Prices should be cabled to the address given in the report.

No. 13632.. Scientific Instruments—The Bureau of Foreign and Domestic Commerce is in receipt of a letter from a foreign legation in Washington stating that a company organized by merchants in a city of one of the Asiatic countries desires catalogs and other information from American manufacturers of all kinds of scientific instruments. This company is organized to purchase several lines of goods direct from the United States.

War Rates for New York Funds

War Rates for New York Funds—Early in the year, the City of New York voted to foreign financial interests about $100,000,000 in short-time securities. These were payable in gold in London and Paris to raise funds for paying the loan a syndicate of New York bankers bought new warrants bearing 6% interest.

A condition of the loan was that improvements authorized by the city during 1915, which are not self-sustaining, are to be paid for 25% from taxes and 75% by the issue of 1- to 15-yr. corporate stock. Improvements authorized during 1916 will be paid for 50% by sale of serial stock; during 1917 they will be met by 75% from the budget and 25% by serial stock, and in 1918 the full cost of such improvements will be met from taxes.

The securities to be issued by the city will be dated Sept. 1, 1914, and $57,000,000 in the form of corporate stock notes will mature Sept. 1, 1915; $43,000,000 in revenue warrants will mature, $18,000,000 Sept. 1, 1916, and $25,000,000 Sept. 1, 1917. They will be delivered to the subscribing banks at once and payment will be made to the city by crediting to its account the amount of the bank's subscription. Of the $57,000,000 one-year corporate stock notes, Comptroller Prendergast stated, $35,000,000, which are for self-sustaining improvements, will be refunded by 50-year stock, and the remaining $22,000,000 refunded by the new 1- to 15-year serial stock to be retired out of taxes at their maturity. The Comptroller said the only way the city could secure any gold at this time, to pay its maturing obligations, was to get all the banks to coöperate.

Mayor Mitchel said that he took measures to find out if gold could be secured by the city from the Federal Government, but found that it was impossible to get gold from that quarter. The Comptroller said this confirmed his earlier experience in the same matter. The Comptroller said he realized this plan will result in an increase in the tax rate and will restrict improvement work.

Henry P. Davison, of J. P. Morgan & Co., said: "I consider it a great thing that anybody should be able to raise $100,000,000 in times of stress like these. The success of the loan was due to the patriotism of the banks of the city."

A shipment of $5,000,000 in gold was made Sept. 13 by J. P. Morgan & Co., to the newly established branch of the Bank of England at Ottawa, Ont.
